

Exercise: Introduction to Bootstrap

5. Write the HTML code to create a table in which there are 4 columns(ID , Employee Name, Designation, Department) and at least 6 rows. Also do some styling to it.

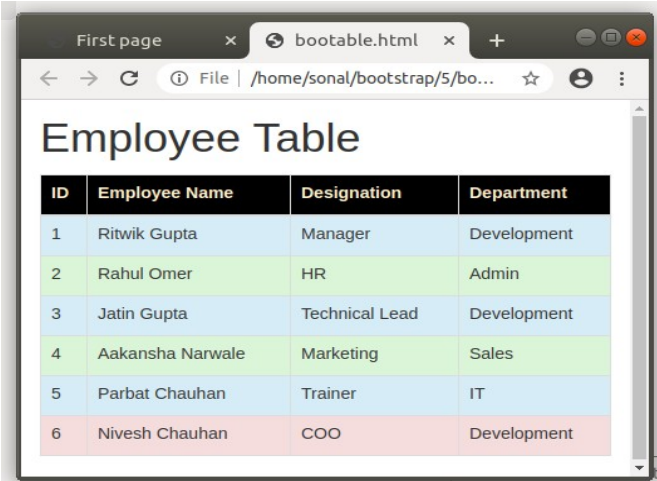

I had created responsive table using bootstrap classes.
Desktop Screen:

The screenshot shows a web browser window with the title 'First page' and the address bar displaying 'File | /home/sonal/bootstrap/5/bootable.html'. The page content is titled 'Employee Table' and features a table with 4 columns: ID, Employee Name, Designation, and Department. The table has 6 rows of data, each with a unique background color for the data cells.

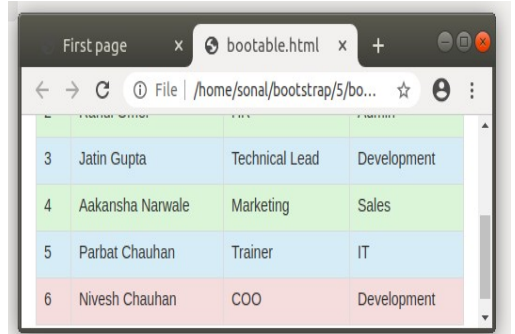

ID	Employee Name	Designation	Department
1	Ritwik Gupta	Manager	Development
2	Rahul Omer	HR	Admin
3	Jatin Gupta	Technical Lead	Development
4	Aakansha Narwale	Marketing	Sales
5	Parbat Chauhan	Trainer	IT
6	Nivesh Chauhan	COO	Development

Responsiveness: The scroll bar is shown

This screenshot shows the same 'Employee Table' as the desktop view, but with a vertical scrollbar on the right side, indicating that the table content is scrollable within the browser window.

ID	Employee Name	Designation	Department
1	Ritwik Gupta	Manager	Development
2	Rahul Omer	HR	Admin
3	Jatin Gupta	Technical Lead	Development
4	Aakansha Narwale	Marketing	Sales
5	Parbat Chauhan	Trainer	IT
6	Nivesh Chauhan	COO	Development

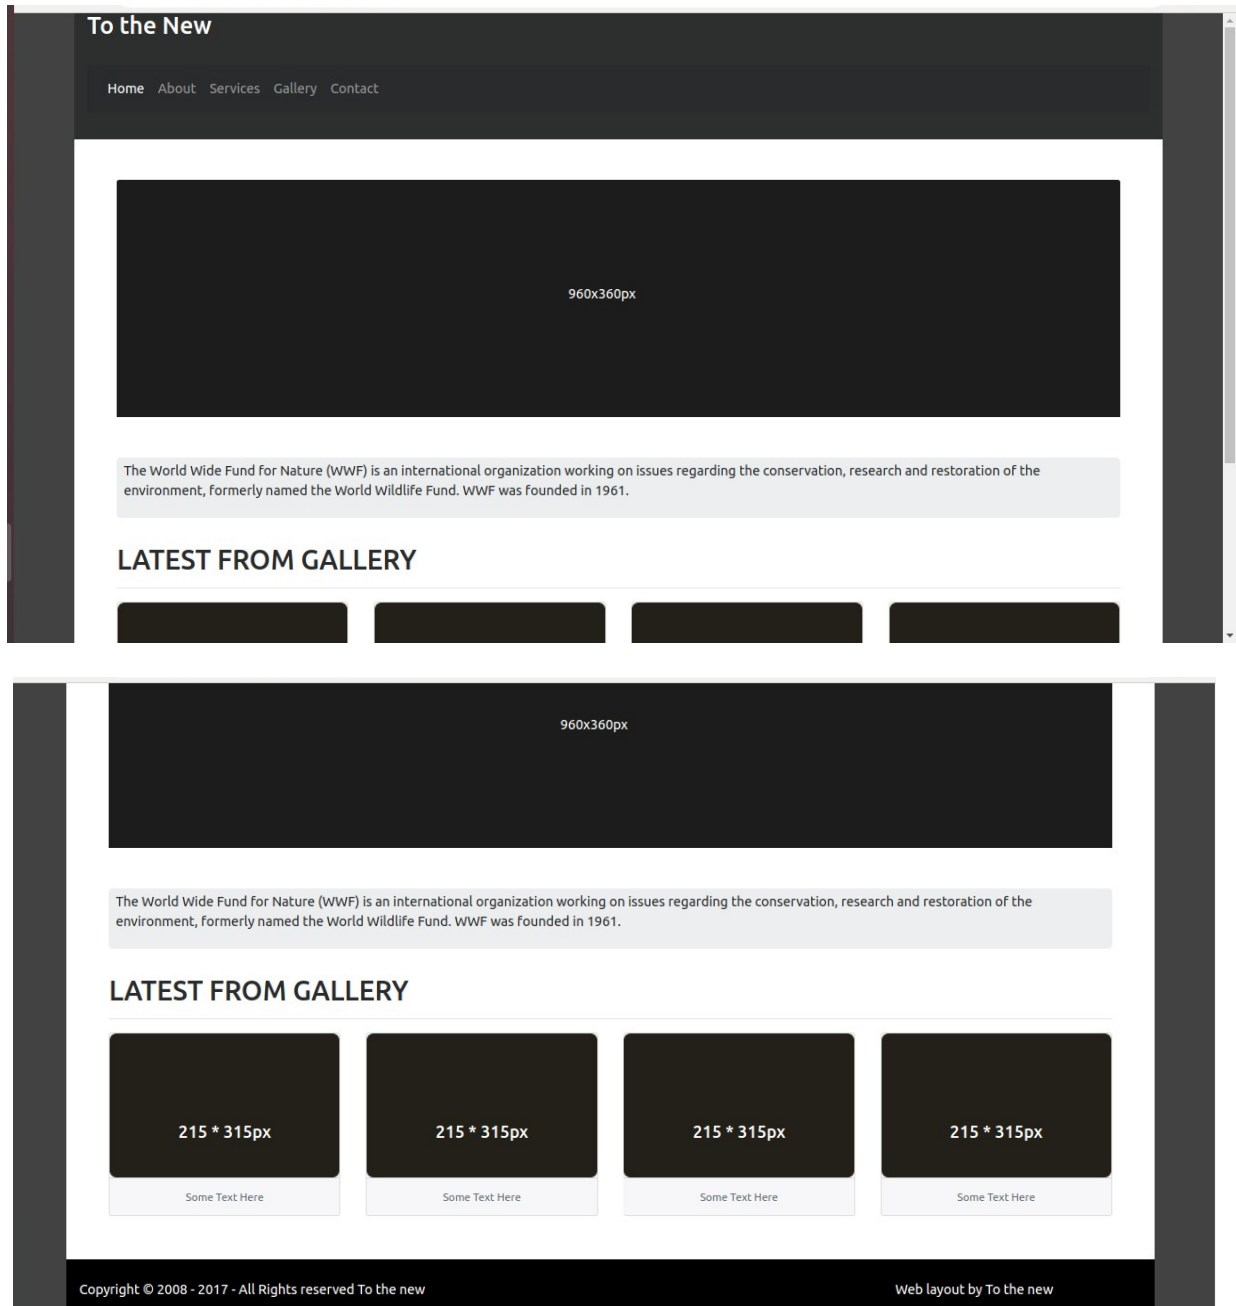

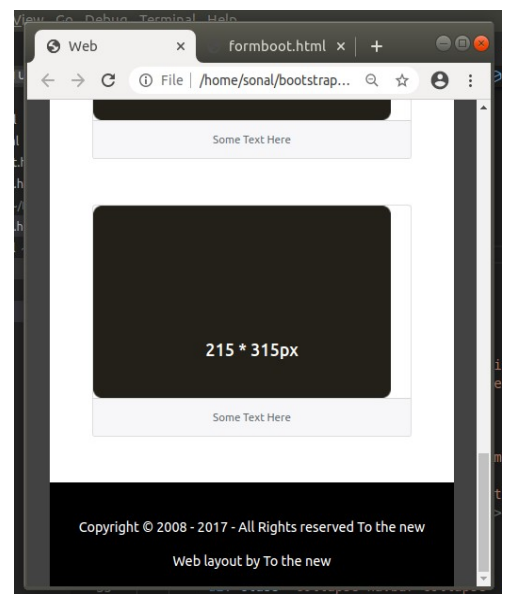

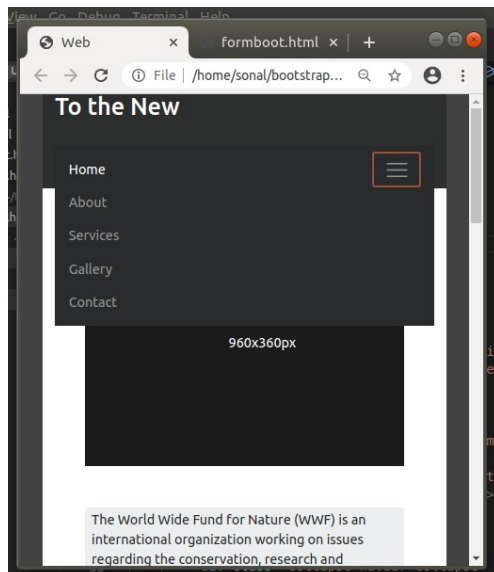

This screenshot shows the 'Employee Table' in a mobile view. The table is displayed with a vertical scrollbar on the right side, demonstrating its responsiveness and ability to be viewed on smaller screens.

3	Jatin Gupta	Technical Lead	Development
4	Aakansha Narwale	Marketing	Sales
5	Parbat Chauhan	Trainer	IT
6	Nivesh Chauhan	COO	Development

11.Create HTML for web-page.jpg (check resources, highest weightage for answers)

Responsive page:

12. Create HTML for form-page.png(check resources, highest weightage for answers)
